13. Comprehension.

A computer has many parts that work together to help it do different tasks. One important part is the **monitor**. It looks like a TV screen, and we can see pictures and words on it. Another important part is the **keyboard**. It has keys with letters and numbers that we press to tell the computer what to do. The **mouse** is another part we use. It's like a little hand that helps us point and click on things on the screen. Inside the computer, there is a **central processing unit (CPU)** that is like the computer's brain. A CD is like a shiny, round plate. People can put it into their computers or CD players to listen to music or watch videos

1. Which device is like shiny, round plate?

Ans. CD

2. Name the device that is used to point and click on things.

Ans. Mouse

3. What is the abbreviation of CPU?
