8. Columns

9. Label the diagram.

10. Drag and Drop

Look at the pictures and write the type of resource in the relevant column.

Builder	Animals	Truck	Factory	Painter

Example	Type of Resource
Animals	Natural
Builder	Human
Truck	Capital
Painter	Human
Factory	Capital

11.Comprehension

Fill in the blanks after reading the paragraph and observing the picture carefully.

Resources are materials, objects, and natural things used to fulfill human needs, such as air, water, food, plants, animals, minerals, and metals. They are categorized into three types: natural, human, and capital resources. Natural resources include plants, animals, water, land, forests, and soil. Human resources refer to people who contribute their skills and labor to produce goods and services. Capital resources consist of tools, machines, and buildings used to create products and provide services.

i. What are resources?

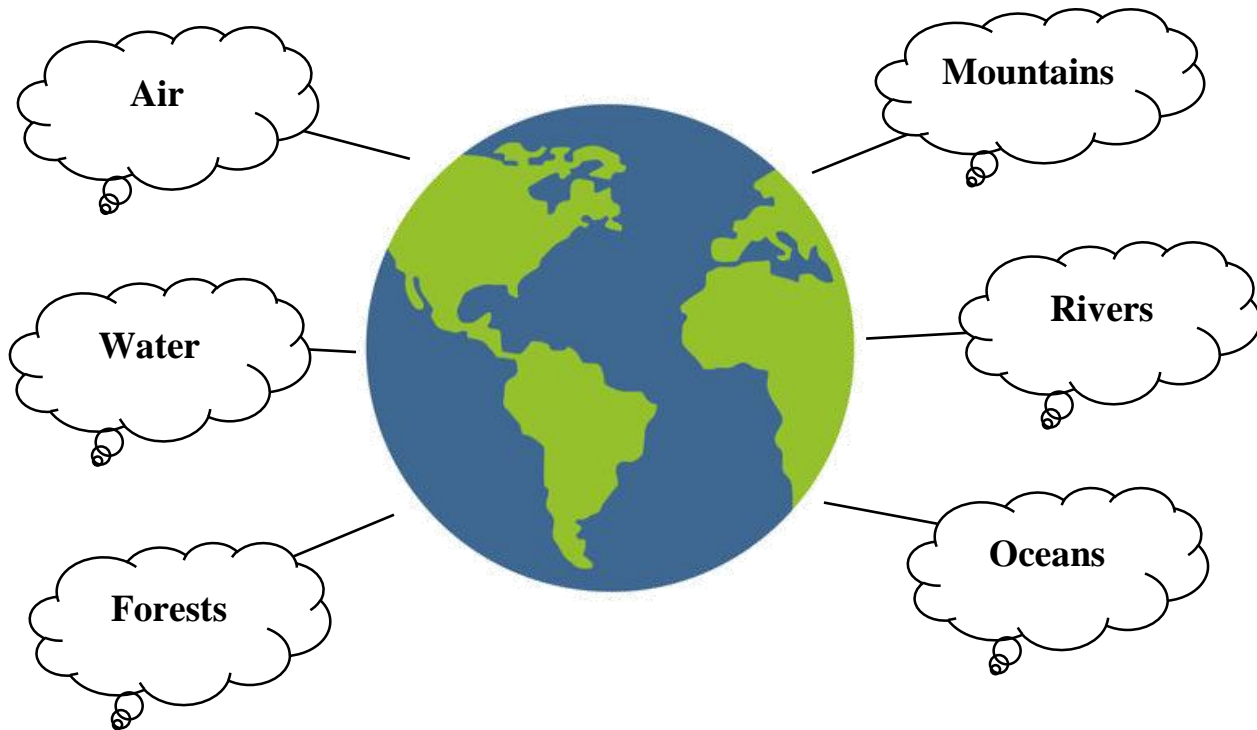

Resources are materials, objects, and natural things used to fulfill human needs.

ii. Write some examples of natural resources.

Natural resources include plants, animals, water, land, forests, and soil.

Let's try it

Complete the following mind map with natural things (air, water, forests, etc.) found on Earth.

Visit your nearest market with your parents and look for your favorite things. Make a list of the things which are available and a list of the things which are not.

Available	Unavailable
Apples	Toys
Bananas	Clothes
Chocolates	Shoes
Bread	Colour box

Fill in the blanks:

- i. A teacher provides **teaching** services.
- ii. Machinery and tools are **capital** resources.
- iii. A **buyer** is a person who gets things for money.
- iv. Goods are **things** that we can use, touch, or hold.

Answer the following short questions:**iii. What are resources?**

Resources are materials, objects, and natural things used to fulfill human needs.

iv. Define capital resources.

Capital resources are the tools, machines and buildings used to make to make goods and provide services.

Examples:

- Factory
- Hammer
- Computer

v. Differentiate between human and natural resources.**Human resources:**

Human resources are the people like painters or builders who work and provide skills and labor.

Natural resources:

Natural resources are materials found in nature, like water, trees and minerals and can be used to make products.

vi. What is scarcity? Explain the term with an example.

Scarcity means there is not enough of something to meet everyone's needs

Example:

If there is a drought, that creates scarcity of water

vii. List some goods and services you use and benefit from.

Goods:

Books: For reading and learning.

Toys: For fun and play.

Services:

Teachers: Help us learn new things.

Doctors: Keep us healthy and help when we are sick.
