

1. Crosswords

Across	Down
3. non-living components	1. lungs of Earth
5. natural home	2. living components
	4. producers

2. Jumbled Words

Jumbled words	Arranged words
i. TICLASP	Plastic
ii. PERPA	Paper
iii. INGLIV	Living
iv. MESTDOIC	Domestic
v. LIDW	Wild

3. Words Search

Find the following word in the words search.

Ecosystem	Ocean	Forest	Desert	Land
-----------	-------	--------	--------	------

E	F	A	T	L	A	F	F	B
C	M	D	B	A	I	O	N	U
O	C	E	A	N	A	H	N	R
S	M	S	E	D	L	E	S	R
Y	V	R	K	H	E	A	E	O
S	I	R	U	E	E	R	A	W
T	N	T	F	O	R	E	S	T
E	R	O	C	O	D	I	L	E
M	G	H	Y	U	J	S	G	F

4. Fill in the blanks using the given words.

Water	Environment	Energy	Sun	Air
--------------	--------------------	---------------	------------	------------

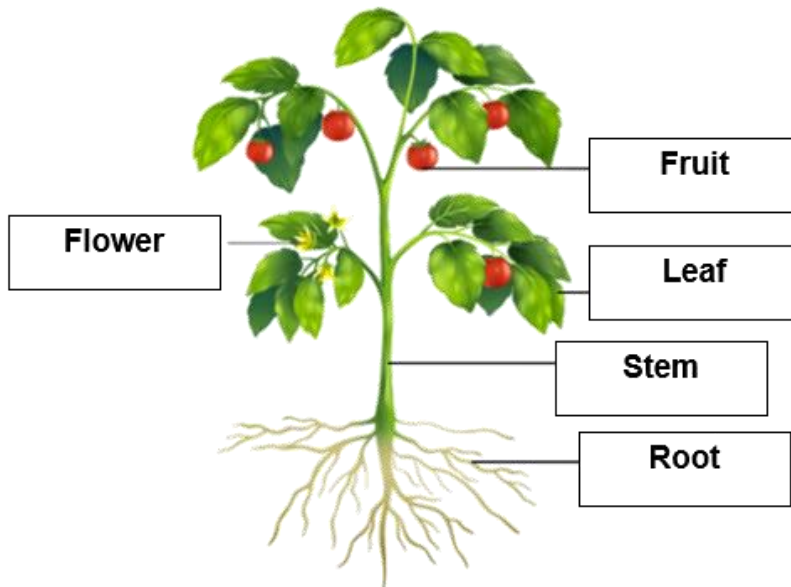

- i. We need clean air to breathe.
- ii. The Sun gives us light.
- iii. 3R strategy help to protect the environment.
- iv. Solar panels can turn sunlight into energy.
- v. Water is essential for our bodies.

5. Write “T” for the true and “F” for the false statement.

- i. The sun is a source of light and energy for our planet.
- ii. Recycling helps reduce waste.
- iii. Cars running on gasoline are good for the environment.
- iv. Plastic is a biodegradable material.
- v. Wind can be used to generate electricity through wind turbines.

6. Label the diagram.

7. Drag and Drop

Look at the pictures and write their names in the relevant column.

				
Gold	Sun	Wind	Gas	Soil

Type	Resource
Mineral	Gold
Solar Energy	Sun
Renewable	Wind
Non-renewable	Gas
Fertile	Soil

8. Comprehension

Fill in the blanks after reading the paragraph and observing the picture carefully.

Earth is a wonderful planet that we call home. It has land, water, and air. We live together with animals, plants, and other living things. Earth gives us many resources, like clean water to drink, fresh air to breathe, and soil to grow our food. We must take care of our planet by not wasting the resources and by being kind to the Earth and all its creatures. When we take care of our home, it stays healthy and happy for everyone to enjoy.

i. What are the things that live with us?

We live together with animals, plants, and other living things.

ii. What Earth gives us?

Earth gives us many resources.

iii. How can we take care of Earth?

We must take care of our planet by not wasting the resources.

Let's try it

Look at the picture given below. Write the names of the things that are found in nature.

Water	Plants	Soil	Mountains
--------------	---------------	-------------	------------------

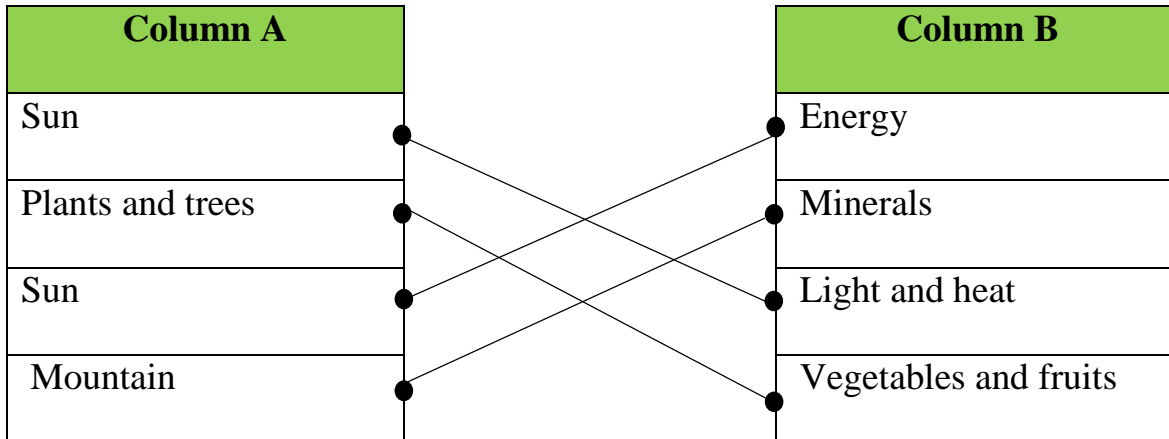

Make a list of any four natural resources that you can use in everyday life. Also write the benefits of each natural resource.

Natural Resource	Benefits
Water	Helps plants grow.
Soil	Provides nutrients to plants.
Air	Essential for breathing.
Sunlight	Provides energy for plants.

Choose the correct option

1. It is found in nature.		
a. air	b. pen	c. chair
2. Living things cannot live without it.		
a. Resources	b. water	c. pen
3. We get solar energy from		
a. water	b. the Sun	c. air
4. It is used as a fuel.		
a. water	b. coal	c. air

What do we get from the given things? Match the columns.

Answer these questions.

i. What is our environment made up of? Give examples.

Our environment is made up of air, water, soil, and living things like plants and animals.

ii. How does sunlight benefit us?

Sunlight benefits us by providing energy for plants and helping our bodies produce vitamin D.

iii. What do you think is the most important natural resource? Explain.

Water is the most important natural resource because all living things need it to survive and grow.

iv. Give one way to save water at home

Turn off taps while brushing teeth.

v. Name three things that come from trees.

- Wood
- Oxygen
- Fruits
