6. Drag and Drop

Look at the pictures and write their names of pollution in the relevant column.

				
Water	Air	Noise	Land	Light

Pollutants

Machines and vehicles

Garbage

Industrial waste water

Smoke, harmful gases

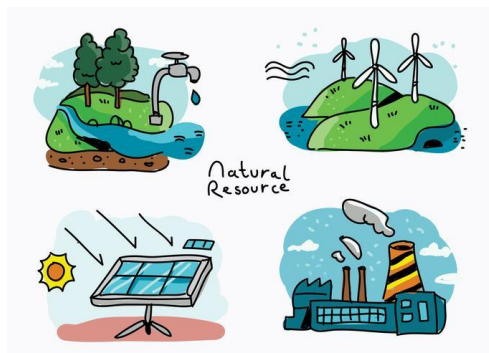

Over lighting in a shop

Types of pollution

7. Comprehension

Answer the following questions after reading the paragraph carefully.

Conservation of natural resources means using our planet's resources wisely so that we don't waste them. Natural resources include things like water, trees, and minerals. We can save water by turning off the tap while brushing our teeth. Planting trees is important because they give us clean air to breathe and provide homes for animals. By doing small things, like turning off lights when we leave a room and not wasting food, we help to protect our environment for the future.

1. Name two natural resources mentioned in the paragraph.

2. How can we save water according to the paragraph?

3. Why is planting trees important?

Let's try it!

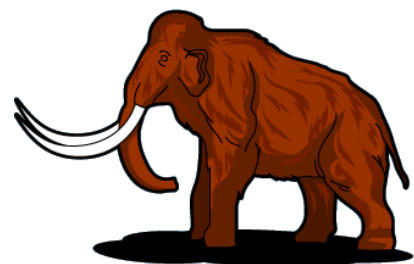

Look at the picture. How is the right view different from the left view? Write the differences below.

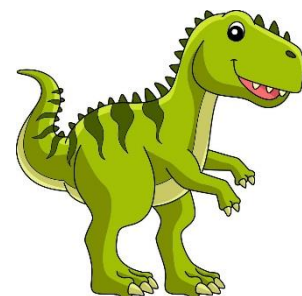

Work it out

Write whether the following animals are endangered or extinct.

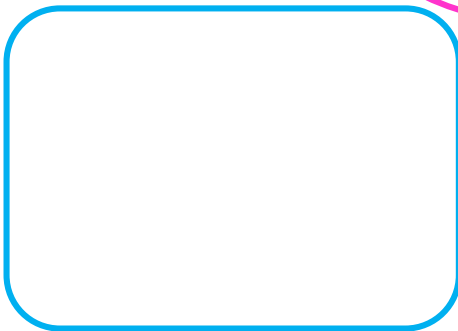

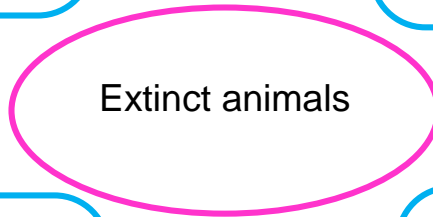

Collect pictures of some extinct animals and paste them below.

Choose the correct option.
