Tap water

Ocean

Hand pump

River

Pond

Water sources

Types

Tap water

Ocean

Hand pump

River

Pond

8. Comprehension

Answer the following questions after reading the paragraph carefully.

Water comes from many places on Earth. Some sources of water are oceans, rivers, lakes, and streams. Oceans are very large bodies of salt water. Rivers and streams are flowing bodies of fresh water that move from one place to another. Lakes are large areas of still water, and they can be found on land. All of these sources provide water that is important for drinking, bathing, and helping plants and animals.

Questions and Answers:

1. What are some sources of water?

2. What is an ocean?

3. What are lakes?

Let's try it!

Work it out
